

I do not agree that the current rules and policies on ownership need realxing! Please, let's safeguard our rich and diverse broadcast media against the eventual mediocrity that would result! It seems like common sense to guard the freedoms we have in these very tentative times. We saw how easily the media can be controlled by our government during the recent "war". I believe this would be one more step in the process of nationalizing the media. It certainly takes the diversity out of what we see.
